

www.ssf.npolar.no

Everything you always wanted to know about Research in Svalbard but were afraid to ask!

It's all in here!

To extract this knowledge,
the Research Council of
Norway has established the
Secret Svalbard Force SSF

Agent C

Agent M

The tool

Research in Svalbard database

Surprise!

Ok - now we get serious!

Where
(on earth)
is the RiS database?

The project CO₂-free Svalbard has started trial drilling 03.10.2007

 A core drilling of the bedrocks beneath Longyearbyen started last Thursday to investigate if the bedrock contains the right sedimentary layers for depositing CO₂. It is the first time drilling for CO₂ deposits has been done in Norway.

Svalbard's glaciers 28.09.2007

 The Norwegian Polar Research Institute is conducting a study of the glaciers in Svalbard.

Consequences of climate change 24.09.2007

 The processes and consequences of climate change in the Arctic region.

How terrestrial insects survive the Arctic winters 14.09.2007

 The Arctic springtail *Onychiurus arcticus* regularly survives temperatures of -14°C and re-emerges in the spring. Researchers investigate the processes behind this tolerance against extreme conditions.

"Geodiversity of Polar Landforms" - Regional Conference on Geomorphology, Svalbard, 1-5 Aug 2007 12.09.2007

 Geomorphologists from all over the world had an unique opportunity to see polar landforms in selected places on Svalbard. The meeting attracted 41 scientists from 16 countries - a number limited by the capacity of the research ship that was taking people to visit Polish research stations on Svalbard.

Tadaa!

And why should you bother?

1. You will need the RiS-ID for doing research in Ny-Ålesund!

Project report

General information:

RIS ID:	2621
Project acronym:	REGISTER NOW
Project complete name:	Cake consumption in relation to database awareness of scientists
Project start date:	2007/12/01
Project end date:	None
Summary:	I will not stop before everyone has registered all their projects. Believe me - there is no way of escape. You better do it right away - it's only for your best. And by the way - I wish you all GOD JUL%21
Project status:	In Work
Web pages:	http://www.ssf.npolar.no/pages/database.htm
Pre-defined keywords:	HUMAN DIMENSIONS>HUMAN HEALTH>PHYSIOLOGICAL PARAMETERS
Self-defined keyword:	psycho terror
Field start date:	2007/12/01
Field end date:	None
Location:	Svalbard
Research station affiliated to project:	Svalbard Science Centre (Norway)

And why should you bother?

2. You do not want to be the only one not represented in the database

Unknown scientist

Famous scientists with many cooperation partners,
good funding and frequent press coverage;
probably already suggested for the Nobel prize

And why should you bother?

3. You do not want to mess with agent C!

And why should you bother?

3. You do not want to mess with agent C!

1. phase:
Being nice

2. phase:
Being persistent

3. phase:
Being a nightmare

And why should you bother?

4. It's cool to use the RiS search function!

SVALBARD RESEARCH DATABASES - PROJECT SEARCH
